# **Suspension Penalty Reporting**

June 2024

Effective immediately, every penalty assessed during a game competition that has a mandatory suspension associated with it shall be reported using the USAH Game Reporting System. In the event that a player or coach cannot be found using the USAH search tool, the report must still be submitted making sure the player/coach's name, team and number (if applicable) are contained in the narrative of the incident. The appropriate personnel will investigate the issue of missing participant information and will edit the report so that the correct information is available for the proper tracking and implementation of any necessary progressive suspension penalties that might be activated within that season. If for any reason an on-ice official can not get a report to submit, document all details in an email to [gamereportissue@missourihockey.org](mailto:gamereportissue@missourihockey.org) so that it can be investigated and properly documented.

All zero tolerance reports must be reported using the same procedure and parameters as listed above for suspension penalties.

All match penalties assessed need to have a clear, legible copy of the entire scoresheet with correct notation of the match penalty and description of the violation clearly listed. This scoresheet copy shall be sent via email to [matchscoresheet@missourihockey.org](mailto:matchscoresheet@missourihockey.org)

For all MHI sanctioned teams: When playing a game outside the geographical jurisdiction of Missouri Hockey and a match penalty has been assessed to your team, the head coach or team manager shall secure a legible complete copy of the game scoresheet and email it to [matchscoresheet@missourihockey.org](mailto:matchscoresheet@missourihockey.org)

This applies to sanctioned USA Hockey games/tournaments only.
